# CHOKING

COMPLETE / SEVERE AIRWAY OBSTRUCTION

**Ensure Safety for Self and Others** 

Dial Triple Zero (000) for an Ambulance

Child and adult: Back blows - lean forward. Chest thrusts - upright, use your other hand to hold them or position against a stationary/stable object so you don't knock them over (e.g. wall, in a chair etc.)

Infant: Back blows - head downwards so gravity will assist with expulsion. Across your lap/thigh or over your arm. Chest thrusts – turn over.

This is one method for infant- if having to act quickly where no seat is available to allow for positioning over the first aiders thigh.

If the object cannot be dislodged by coughing - Call 000 Then do the back blow / chest thrust sequence.

#### **SIGNS & SYMPTOMS**

- Trying to breathe
- · Gasping, coughing
- · Cannot speak or breathe
- No escape of air can be felt
- Hands held to throat
- · Extreme anxiety, agitation

**HAZARD** = Panic. Complete obstruction.

**RISK** = Unconsciousness. Respiratory arrest. Cardiac arrest. Death.

## **BACK BLOW / CHEST THRUST SEQUENCE**

Give up to

## 5 SHARP BACK BLOWS

In the middle of the back Check for removal between blows REPEAT

Until the obstruction is dislodged.

Still choking, give up to

### 5 SHARP CHEST THRUSTS

In the middle of the chest Check for removal between thrusts

#### IF UNCONSCIOUS

Airway obstruction may not be apparent until assessing the airway and breathing.

Finger sweep if solid material is visible.

Commence CPR for cardiac arrest.
